

## The SIRIC Montpellier “COLORECTAL CANCER” WORKSHOP 13 September 2019 - IRCM- Montpellier

**8h30**                      **Welcome**

### SESSION 1: Updates on therapeutic strategies of colorectal cancer

*Chairman : A. Adenis (ICM, Montpellier)*

- 
- 9h00                      **Adjuvant therapy of colorectal cancer: overview of current strategies**  
*E. Assenat (CHU, Montpellier)*
- 9h20                      **Overview of therapeutic strategies in metastatic colorectal cancer**  
*T. Mazard (ICM, Montpellier)*
- 9h40                      **Instability of Microsatellites and Cancers: New diagnostic and therapeutic Strategies**  
*A. Duval (Centre de Recherche Saint Antoine, Paris)*
- 10h00                     **Tailored management of rectal cancer**  
*P. Rouanet (ICM, Montpellier)*

**10h20**                     **Coffee-break**

### SESSION 2: The tumour microenvironment of colorectal cancer

*Chairman : A. Adenis (ICM, Montpellier)*

- 
- 10h50                     **Activating cancer immunity in CRC by reprogramming the tumour microenvironment**  
*D. Tauriello (IRB, Barcelona)*
- 11h20                     **Intestinal tuft cells : Novel regulators of the immune microenvironment**  
*P. Jay (IGF, Montpellier)*
- 11h40                     **Evaluating the colorectal cancer microenvironment in pathology: candidates and challenges**  
*F. Bibeau (CHU, Caen)*
- 12h00                     **Contribution of cancer-associated fibroblasts to molecular heterogeneity of colorectal cancer liver metastases**  
*A. Turtoi (IRCM, Montpellier)*

**12h20**                     **Lunch**

### SESSION 3: Tools and models for colorectal cancer translational research

*Chairman : P. Jay (IGF, Montpellier)*

- 
- 13h30                     **Assessing functional heterogeneity in colorectal cancer**  
*H. Snippert (Center for Molecular Medicine, UMC Utrecht)*
- 14H00                     **Developing translational cell biology approaches**  
*F. Jaulin (Institut Gustave Roussy, Villejuif)*
- 14h30                     **Intraperitoneal drug delivery: uncertainties and experimental models**  
*W. Ceelen (Ghent University Hospital)*
- 15h00                     **Comparison of the different methods for circulating DNA analysis**  
*A. Thierry (IRCM, Montpellier)*

**15h20**                     **Coffee-break**

### SESSION 4: New targets and therapeutic strategies in colorectal cancer

*Chairman :P. Jay (IGF, Montpellier)*

- 
- 15h50                     **Tyrosine kinase signaling in metastatic colon cancer**  
*S. Roche (CRBM, Montpellier)*
- 16h10                     **Inhibition of ATR overcomes resistance to oxaliplatin and promotes anti-tumour immunity in colorectal cancer.**  
*C. Gongora (IRCM, Montpellier)*
- 16h30                     **Characterisation of BRAFV600E mutated cells in CRC**  
*J. Pannequin (IGF, Montpellier)*

**16h50**                     **Close**
